Different versions of the same email

Prepared comparison aid - September 7, 2026. Software and ChatGPT assistance were used. This page replaces the former V-5 description.

Feature	May 21 version	August 14 version
Readable text	James asks Hodo to send the video to her Chief because she cannot forward it.	Microsoft protection notice; protected content was not decrypted.
Exposed attachment	No ordinary attachment listed.	One message.rpmsg protected object.
File size	37,376 bytes	110,592 bytes

Later production credited

The August 28 USB version is byte-identical to the May 21 file. The August 25 version has readable text matching after formatting/punctuation normalization. The separate October 27 forward and its MP4 were also supplied directly to Kyle on August 25.

Limit

The May 21 file was not bodyless. Different file versions do not establish that anyone removed an attachment, that a video belonged on every reply, or that the protected object contains additional information.

Sources: preserved May 21, August 14, August 25 and USB variant checks; Corrected_V5_Comparison.md and native verification files.
