Subject: Your Complaint Received: Water
Date: October 19, 2025 at 9:46 PM
To: [redacted]

Kyle Moring , we have received your complaint and someone from the regional area will be in touch with you.
Below is what you sent to us.
Nature of the complaint affecting you? Water - Stormwater
Who or what you believe is the source: RN105975809
Description: Open, uncovered construction roll-off placed upslope of a storm drain at Walmart Store #131 (TLE remodel). Work included sandblasting/grinding and repainting; nuisance dust observed—provided for context (primary concern is stormwater). Contractors dumped multiple buckets of powder-like material into the dumpster; a heavy rain occurred on 10/18/2025 while the dumpster remained uncovered. Risk of pollutant wash-off to MS4.
How is this affecting you? I am a former employee of Walmart Store #131 and an active whistleblower under OSHA §11(c) and FSMA. This situation affects me by creating a credible risk of polluted stormwater runoff where I frequently shop. Contractors dumped buckets of powder-like material into an uncovered roll-off sited directly upslope of a storm drain; after the 10/18/2025 rain, I was concerned that fines and paint/coating residues could have entered the MS4. The lack of basic BMPs (covered container, inlet protection, washout/containment) has required me to document conditions extensively, notify local authorities, and seek TCEQ assistance to ensure the site is made safe and compliant. I observed the conditions firsthand, have provided documentation in good faith, and request confidential handling to prevent retaliation while this matter is investigated.
Observed: Date I 10/17/2025 - Time I 08:50 AM
Still Occurring? If not, when ended. The issue is occurring
