# Selected RMS activity - identifier-masked source pages

Records-management system (RMS) audit log supplied in the December 3, 2025 MPPD production.

This reading copy reproduces selected original screenshot pages in chronological groups: original pages 10, 9, 8, 7, 4, 3 and 2. It is not the complete report or case narrative. Case and internal record/entity identifiers are permanently masked in the new raster images. The source original remains unchanged.

The original screenshots overlap. A repeated row is not a separate incident. The system shows activity before October 22, including September 19 creation and earlier access.

Displayed system times have no independently verified clock synchronization with other records. The labels do not show before-and-after field contents or reasons for edits. Status codes are reproduced as printed; their meanings have not been independently verified.

These selected pages establish recorded system activity. Timing alone does not establish coordination, motive or a connection to another event.

Source SHA-256 (original unchanged):
7ff472075d035ac32436de4b7e935be158ac0633b82b18f6a6d6306b6ba0e400
