REPRODUCIBLE SOURCE INVENTORY

# Call-screenshot delivery audit

Prepared from the mounted October 23 media, the retained November 3 delivery folder, both original February 2 production ZIPs, and the June 2 OAG-complaint production. The audit reports package contents, file names, sizes, timestamps, attachment checks, and SHA-256 hashes; it does not infer delivery from an email subject line.

| Production | Verified package finding |
|---|---|
| October 23, 2025 - mounted media | **Directly examined September 25, 2026.** The user-visible root contains five Axon MP4 videos and Table_of_Contents.xlsx. It contains no PNG, JPEG, PDF, or other call-history screenshot. All six user files show October 23, 2025 modification times; individual hashes appear on page 2. |
| November 3, 2025 | Five WAV files and three text-message screenshots: IMG_0243.PNG, IMG_0244.PNG, and IMG_0245.PNG. The two later call-history images are absent. |
| February 2, 2026 - Walmart ZIP | 19 files. ZIP SHA-256: 77a64755d72cfbd49a28e1cf06265bbf493607864bb2c26aa6551d96c2e01609. Ten embedded image attachments were inspected; none matches either June call-history image. |
| February 2, 2026 - Moring ZIP | 364 files. ZIP SHA-256: 8338df8534926d02b6e8df6cf8b842a21fe410e595628628c0fc66566e778f58. Ninety-eight embedded image attachments were inspected. The three November text screenshots recur, but neither June call-history image appears by filename or SHA-256 hash. |
| June 2, 2026 - OAG-complaint production | IMG_0486.PNG - SHA-256 137d00ee08982712ba5ca527e9aee9b6eca1644ce9ada4b06eae4fadba132d7c - embedded creation 2026-05-11 15:33:09. IMG_0487.PNG - SHA-256 2d4076be81fd7cbbae923d43ab234f3c80f7359e9f176c412d115e7a487022f6 - embedded creation 2026-05-11 15:33:21. |

**Finding.** The directly examined October 23 media does not contain the two later call-history screenshots. June 2 is the earliest verified delivery of those two images in the reviewed physical media, retained folders, and original ZIP packages.

**Method limit.** The May 11 embedded timestamps concern creation of the screenshot files; they are not the dates of the October 2025 calls displayed within them.

OCTOBER 23 MEDIA

**Scope.** Finder and filesystem enumeration also exposed operating-system housekeeping entries. Those are not user-delivered evidence and are excluded from the six-file content inventory. The five videos and spreadsheet agree with the spreadsheet table of contents and the supplied screenshot of the mounted volume.

**Reproducibility.** A later examiner can compare these SHA-256 values with the same physical media or preserved copies. Matching hashes establish identical file bytes; different filesystem timestamps alone do not establish altered media content.
