October 16: DSHS invitation and call align

Selected telephone-log cells. These are transcriptions from the retained source reconciliation, not images of the original workbooks. Each row retains its source clock and column values, except the CID employee name is replaced with “CID number.” The older vendor headings do not establish a timezone; any Central-time conversion remains conditional.

Copy of CDR_903-575-4149_Jun25-Nov25_262306.xlsx

Inbound Outbound · A1870:E1870

A · timestamp: 2025-10-16T14:51:44
B · seconds: 145
C · originating number: 5122170601
D · dialed number: 9035754149
E · terminating number: 9035754149

Reading these records

The converted call time is 3 hours 30 minutes 43 seconds before Kyle’s later Council email, conditional on that timezone interpretation. The original vendor heading does not confirm the timezone. Call content, caller authentication and independent clock calibration are unverified.

Selected call rows do not by themselves reproduce the whole-day or comparison-window statistical calculation. They do not establish speakers, subjects, answered conversations or a connection to an inspection or complaint.

October 17: internal calls around the City/DSHS meeting date

Selected telephone-log cells. These are transcriptions from the retained source reconciliation, not images of the original workbooks. Each row retains its source clock and column values, except the CID employee name is replaced with “CID number.” The older vendor headings do not establish a timezone; any Central-time conversion remains conditional.

D · dialed number: 9035754108
E · terminating number: 9035754108

Reading these records

The older export covers only 21 observed City endpoints. Durations overlap; four records do not establish four separate conversations, who spoke, or a response to the directive. Exact ordering against the directive has not been established.

Selected call rows do not by themselves reproduce the whole-day or comparison-window statistical calculation. They do not establish speakers, subjects, answered conversations or a connection to an inspection or complaint.

October 27: TCEQ matches need a fax distinction

Selected telephone-log cells. These are transcriptions from the retained source reconciliation, not images of the original workbooks. Each row retains its source clock and column values, except the CID employee name is replaced with “CID number.” The older vendor headings do not establish a timezone; any Central-time conversion remains conditional.

E · terminating number: 9035754190

Reading these records

These are not established environmental-enforcement conversations. The fax destination and the Civic Center endpoint support other possible purposes; historical number assignment and call contents remain unverified.

Selected call rows do not by themselves reproduce the whole-day or comparison-window statistical calculation. They do not establish speakers, subjects, answered conversations or a connection to an inspection or complaint.

September 16 and October 28: FBI-number matches are unverified leads

Selected telephone-log cells. These are transcriptions from the retained source reconciliation, not images of the original workbooks. Each row retains its source clock and column values, except the CID employee name is replaced with “CID number.” The older vendor headings do not establish a timezone; any Central-time conversion remains conditional.

E · terminating number: 9035754010

Reading these records

An incoming caller-ID number can be spoofed. These records do not authenticate an FBI caller, establish an investigation, or connect the calls to Kyle’s complaints.

Selected call rows do not by themselves reproduce the whole-day or comparison-window statistical calculation. They do not establish speakers, subjects, answered conversations or a connection to an inspection or complaint.

February 18: higher daily activity and TCOLE-number records

Selected telephone-log cells. These are transcriptions from the retained source reconciliation, not images of the original workbooks. Each row retains its source clock and column values, except the CID employee name is replaced with “CID number.” The older vendor headings do not establish a timezone; any Central-time conversion remains conditional.

H: 00:00:41

Reading these records

The TCOLE records overlap and may be legs of one transferred call. The main number serves multiple functions; it does not identify one official. No ordering against the meeting time or subject-matter connection is established.

Selected call rows do not by themselves reproduce the whole-day or comparison-window statistical calculation. They do not establish speakers, subjects, answered conversations or a connection to an inspection or complaint.

June 3: a localized increase after the noon CDR escalation

Selected telephone-log cells. These are transcriptions from the retained source reconciliation, not images of the original workbooks. Each row retains its source clock and column values, except the CID employee name is replaced with “CID number.” The older vendor headings do not establish a timezone; any Central-time conversion remains conditional.

Reading these records

23 of the 39 records last under 30 seconds. Activity spans several departments. The full-day count is 121 against a comparison median of 114 and range of 74–149. This is an exploratory timing association, not proof of a response to the email.

Selected call rows do not by themselves reproduce the whole-day or comparison-window statistical calculation. They do not establish speakers, subjects, answered conversations or a connection to an inspection or complaint.
