> We are requesting that you SELECT THE RESOLUTION TYPE that best describes your findings from the attached list of permissible values. Let us know if your findings cannot be categorized by any of the following:
>
> REJECTED:
> The error notification is incorrect and data values are unchanged. Please provide the reason(s) why the error was rejected.
> CORRECTED:
> The error notification is correct and the data value has been corrected in the source system.
> ACCEPTED - LONG TERM FLAG:
> The error notification is correct but cannot be fixed. A long-term data quality flag will be raised. (Please include text for the flag.) If the error is valid, could you let us know approximately when it will be corrected in the source information system.
>
> An important goal of EPA is to provide the public with current and accurate environmental information. EPA receives questions about the accuracy or completeness of the information it provides to the public. Because the information in EPA's data systems comes from programs like your own, our policy is to refer these questions to the organization which owns the information to determine if it is correct or whether it needs to be changed. Our goal is to be as responsive as possible to the public. As such, we ask that you review the information and respond as soon as possible. We appreciate your efforts in assuring that the public has access to high quality environmental information. Thank you for your support.
>
> Please see the Error Notification Interface at EPA's Envirofacts website (https://frs-public.epa.gov/ords/frs_public2/ets_grab_error.smart_form) for more information about the Integrated Error Correction Process.
>
> If you have questions about the error reporting process, please feel free to reply to Error Tracker.
>
> If your question is related to the Enforcement Compliance and History Online (ECHO) Web site, please contact Scott Fontenot (fontenot.scott@epa.gov) or 202-566-2236.
