Council correspondence: count and classification register

This is a site-prepared register of the retained mailbox analysis, not a City-issued record or a new count of unanswered complaints.

146 distinct outgoing messages: 28 action requests, 6 separate governance/preservation notices and 112 records or administrative exchanges. Dates run from October 16, 2025 through August 6, 2026. The source export ends August 15, 2026.

Count distinct outgoing messages whose actual To, Cc or Bcc header includes the Mayor or a Council member. Deduplicate by Message-ID across the six mbox files; quoted emails, ZIP copies and multiple recipients do not add messages. Classify the newly authored message and relevant attachment context, rather than a quoted history.

The 28 action requests comprise 27 oversight, complaint-review or agenda requests and one express Council fee-waiver request. Six additional governance/preservation notices are separate. The remaining 112 messages are records requests, disputes, follow-ups or administrative exchanges with Mayor/Council included. A notice against email deliberation does not exclude an express request for action at a posted meeting.

This is an archived-message count, not proof that every recipient received or read each email, a count of unanswered complaints, or a live-mailbox total. The export ends August 15; the last matching outgoing message is August 6. Later correspondence is outside this count. The older July export index contained no additional Council-addressed Message-IDs.
