# October 8 TLE video exhibit

**SELECTION**

The original one-page video manifest with four representative stills, at 00:04, 00:15, 00:28 and 00:41. No quoted correspondence or other binder pages are included.

**SOURCE CHECK**

The supplied 45.43-second MP4 matches the binder checksum and byte count. All four stills match freshly extracted video frames pixel for pixel. The original file remains privately preserved.

**DATES**

The file's Apple capture-date field says October 8, 2025, at 12:26:53 p.m. Central Daylight Time. Its container creation date is October 20. The label TLE-PM is the supplied filename, not a separate timestamp verification.

**LIMITS**

The image sequence does not establish material composition, final disposal destination, discharge into a drainage inlet, or a regulatory violation. This is a still-image exhibit; the complete video and soundtrack are not cleared by this selection.

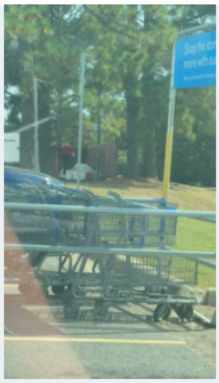

**LATER AGENCY EXPLANATION**

On November 21, 2025, the supplied TCEQ call transcript records staff describing proper disposal and closing the waste complaint. The submitter disputes aspects of the handling. The stills are evidence to consider with those accounts, not an agency finding.

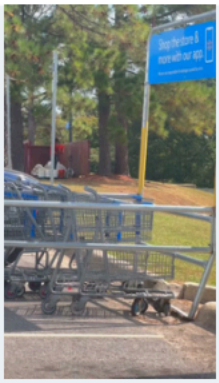

EXHIBIT C - MEDIA

# Video manifest and representative frames

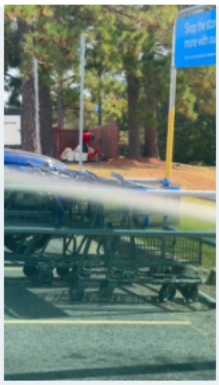

The native MP4 was attached to the October 27 EPA-TCEQ-City referral chain and is available as a separate digital exhibit upon request. These four stills are illustrative excerpts, not a substitute for the complete video.

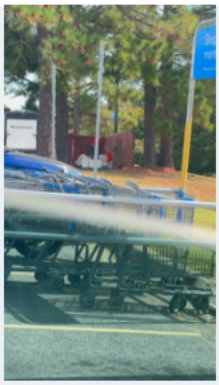

**Representative frame near 00:04**

**Representative frame near 00:15**

**Representative frame near 00:28**

**Representative frame near 00:41**

Filename: 2025-10-08_Store_131_Environmental_Concerns_TLE-PM.mp4
Duration: 45.43 seconds | Size: 22,171,952 bytes | Display: 360 x 640 portrait
SHA-256: e67df7add34a8ec9fe30d408a8226b8dba11774795adbf7916437b9c480225b6
Limit: stills do not establish composition, disposal destination, or entry into a drainage inlet.
