KR

Mr. Moring,

Can you clarify whether this relates to the remaining issues of emails not provided in native format? If this is not related to that complaint or the underlying requests in it, please submit a separate complaint on this information.

I continue to try and address the remaining issues of metadata and full email information with DSHS. To that end, have you already provided the released information for each of the requests in the spreadsheet you prepared? It would be good to see what DSHS provided and compare it to what you believe is missing or outstanding. This can also help when discussing with DSHS in an attempt to obtain any outstanding information.

Thank you.

Mr. Richardson,

I am attaching a single indexed PDF binder containing new USDA FSIS records and September 11 ORD correspondence that may be relevant to your continuing review of my DSHS complaint and request for revision.

On September 17, USDA FSIS released forty-six pages under FOIA request 2026-FSIS-00228-F. The tracking entry on binder page 8 identifies my July 20, 2025 complaint, confirmation number 07-20-2025-001917, and lists its status as "Forwarded to DOH," which I understand to refer to DSHS. The original complaint appears on binder pages 47–50. The production also includes DSHS complaint and inspection records concerning the Walmart conditions.

I have not located the corresponding USDA referral or DSHS receipt and handling communications in the productions DSHS made to me. This federal record identifies a specific referral to reconcile with DSHS's searches, productions, and representations that responsive information had already been supplied. If "DOH" identifies a different recipient, clarification of that recipient would help resolve the discrepancy.

Separately, binder pages 51–53 show that ORD transmitted my asbestos-related records complaint, OR-26-040479-IC, to DSHS on September 11 and requested a written response within ten business days. That complaint concerns my June 17, 2026 request, identified as ORR M-1-061726. The complete complaint attachment follows on pages 54–129. I do not presently have DSHS's response or know the outcome of ORD's review.

My request for revision remains outstanding. I am providing these materials because they may assist your review of whether DSHS has fully accounted for the responsive records.

I will address the City of Mount Pleasant matters in a separate email.

Thank you for your time and continued attention.

Respectfully,

Kyle Douglas Moring

Mr. Richardson,

I am attaching two separate branches of correspondence received today concerning the Walmart Store 131 asbestos matter. They establish different facts, and I want to distinguish them carefully.

First, at 7:18 a.m., Angela Hays of EPA Region 6 informed me that the matter had been formally referred to DSHS and stated that "the information you previously submitted in January and June has been provided to TDSHS." She separately stated that she would forward my
